Website Security

October 24 – 26, 2016

WE are glad to announce a Programme on Website Security, October 24 – 26, 2016, that we hope will help fill the knowledge and skill gaps of your IT personnel in this area. We appreciate your active participation in making your security technologies more robust.

Introduction:

In a digital world, Website is the primary customer touch point. Today's websites offer a vast number of features to facilitate online services. The new features are facilitated by rapid evolution of new website development techniques. The current generation websites do not work on isolation, but instead need to be able to seamlessly and securely integrate with services offered by other websites. In this programme we highlight the evolving trends in website design and also the associated security precautions to be taken.

Objectives:

To train the IT professional and website administrators of banks in the following aspects of website management:

- * Configuration security
- * Access security
- * Operating security
- * Web server security
- * Secure Socket Layer
- * 2 factor authentication
- * Session management
- * Attacks on websites and remediation.
- * Digital certificates.

Contents:

The programme involves sessions by faculty from IDRBT, Industry and from banks. The programme theoretical aspects as well as issues to deal with real world deployment and administration of corporate websites. Hand on exercises and practise sessions shall be provided to facilitate better understanding of concepts

Participants Profile:
