Credit Recovery Analytics

Coordinator: **Dr. Sagar Koparkar**

JULY 10 – 12, 2017

Credit Recovery Analytics

July 10 – 12, 2017

Coordinator: **Dr. Sagar Koparkar**, Adjunct Faculty, IDRBT

e-mail: sagar.koparkar@gmail.com

Introduction

With the alarming growth in non performing assets, the banks are already in poor shape, with low levels of reserves against those loans and low capital ratios. This could hamper credit growth, subsequently GDP growth of the country. Hence, this needs to be resolved at a strategic level i.e. using the best available technology and information (credit bureaus) to reduce the levels of stressed assets by DMAIC (Define, Measure, Analyze, Improve and Control) approach.

This workshop focuses on the need for recovery of stressed assets to pave way for future credit growth – using data mining & analytics. The potential resources in banks are trained on the recovery model development using best information available and its application in various strategic initiatives in recovery. This will help banks to look at their portfolio more objectively by measuring it, analyzing it, thereby improving the recovery step by step.

Objective

The main objective of this workshop is to train the participants to use credit bureau data effectively in collection/recovery management in the retail finance industry. This is achieved through providing participants with an exposure on retail finance, statistical procedures, database knowledge and software and how this is used to improve profitability of a bank through case studies. The participant would not only get trained in analytics and recovery modelling, but would also improve their decision-making abilities and get themselves ready for bigger role in their future career.

Contents

- * Introduction to Analytics: Statistics
- * Introduction to Analytics: Data Mining
- * Why Analytics in Recovery (Current BAU Vs. Latest Trends)
- * Recovery Case Study from Indian Market (This gives a real life scenario on how analytics works in recovery)
- * Hands-on Session I: Data from Case Study: Compilation, Creation of Modeling Window, Creation of Necessary Variables
- * Hands-on Session II: Development of basic models for targeting (e.g. segmentation through pivot tables or regression)

End Use

Participants shall learn to take the route of analytics in solving the perennial problem of recovery of loans.

Faculty

Faculty of IDRBT, Guest Speakers from the Industry & Practitioners.

Who Can Participate?

Executives from Banks and Financial Institutions, who work in Credit Risk Policy, Recovery, MIS, of retail finance and are interested in decision-making, experimentation, trying new ideas and having comfort with mathematics and statistics, good knowledge and experience of computers. Scale: I to IV.

Fee Details

Domestic Participants from

- * RRBs & Coop Banks : Rs. 20,700/- (Rs. 18,000/- + 15% Service Tax)
- * All other Banks & FIs: Rs. 27,600/- (Rs. 24,000/- + 15% Service Tax)

Foreign Participants from

- * SAARC Countries : US \$ 690/- (US \$ 600/- + 15% Service Tax)
- * Other Countries : US \$ 1035/- (US \$ 900/- + 15% Service Tax)

The fees for our programmes can be remitted through NEFT and the bank account details for fee payment available at: <http://bit.ly/PAYFEES>.

Nominations

Nominations should be sent to us latest by **June 26, 2017** by email to program@idrbt.ac.in

Venue & Timings of Programme

Venue: IDRBT

Timings: 9.30 AM to 5.30 PM

How to Reach IDRBT

A major landmark near Masab Tank flyover is NMDC. IDRBT is located just behind NMDC. Google Pin: <http://bit.ly/IDRBT>

Accommodation and Travel Plans

The boarding & lodging arrangements will be made at IDRBT, Hyderabad. The participants will be provided single occupancy a/c rooms.

Check-in : From 3.00 PM on Sunday, July 09, 2017.

Check-out : 7.00 AM on Thursday, July 13, 2017.
