

Institute for Development and Research in Banking Technology
(Established by Reserve Bank of India)

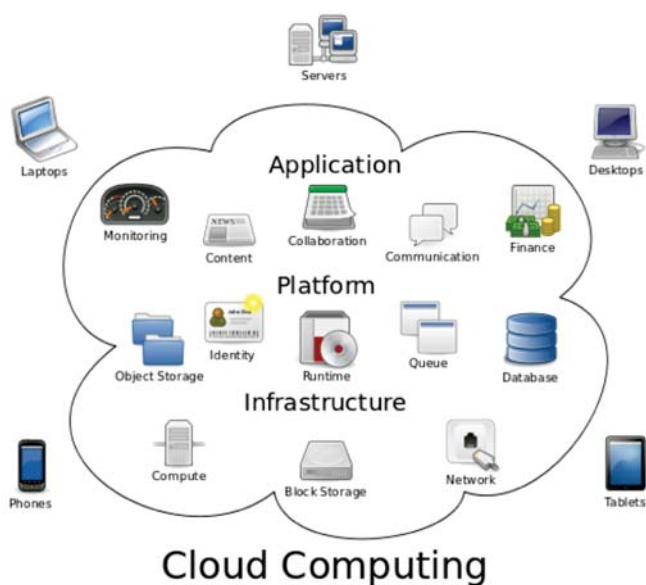

May 22 – 26, 2017

WE are glad to announce a Programme on Cloud Computing Challenges, May 22 – 26, 2017, the details are given below.

Introduction:

The banking industry is in a state of continual transformation. Rapidly evolving customer expectations, rise of non-traditional players, and increasing regulatory pressures demand a swift response from banks to ensure retention of market share and a profitable sustenance. To function effectively in a customer-driven environment, business agility has emerged as a key imperative for banks.

Cloud computing is a technology that can help banks gain the required agility as they strive to reduce costs and streamline operations.

Cloud computing can play a significant role in a bank's efforts to reinvent its business and operating models. In technical terms, a cloud computing platform automatically assembles, connects, configures and reconfigures virtualized technology resources to meet business goals. In business terms, it eliminates constraints around where physical IT resources are located or what specific technologies are employed, which makes it possible to deploy business services rapidly and at a lower cost.

Thus, it is important to understand what cloud computing is, why it is so promising, what impacts it will have on banking industry and what are the benefits and challenges to banks when adopting cloud computing.
