# Secure Web Application Development

Coordinator: **Dr. Rajarshi Pal**

APRIL 22 – 24, 2019

# Secure Web Application Development

April 22 – 24, 2019

Coordinator: Dr. Rajarshi Pal, IDRBT  
e-mail: [prajarshi@idrbt.ac.in](mailto:prajarshi@idrbt.ac.in)

## Introduction

In today's world, there is almost no need to mention the need for web applications. Many times, you depend on a third-party developer even to create the simplest of web applications. This program attempts to train you on web application development.

Moreover, vulnerabilities in your web application may allow an attacker to gain access to your resources. But many times, the lack of proper knowledge about secure development leaves your web application with vulnerabilities. Moreover, VAPT of your web application may not be carried out effectively without the knowledge of possible security loopholes in the web application.

Hence, this programme aims to teach you how to develop a secure web application. Even if you depend on a third-party developer/security professional who builds your web application/carries out VAPT for your web application, the knowledge of the technology will help you to carry out a better interaction with your outsourced resources.

## Objectives

- ★ To train you on web application development so that you can minimize your dependency on third-party organizations at least for the simplest of web applications
- ★ To help the bank to build an in-house pool of application developers
- ★ To provide sound application development guidance for web application developers so that the web applications may be developed with security in mind
- ★ To provide guidance to application developers on testing web applications for security vulnerabilities.

## Contents

The content of the programme will help you to learn (with hands-on) web application development using the following languages:

- ★ HTML
- ★ CSS
- ★ JavaScript, Node.js, JQuery
- ★ PHP

Moreover, the following topics will be covered to cover the security related aspects:

- ★ Web Application Vulnerabilities
- ★ Secure Coding Practices

## Faculty

Faculty of IDRBT, Guest Speakers from the Industry & Practitioners.

## Who Can Participate?

The members from IT team who can be inducted into the pool of web application developer for developing in-house applications. This programme is for the beginner's in web application development.

## End Use

The participants of this programme can be inducted in the in-house pool of web application developers. The participants will also have security in mind while developing the applications.

Even if, the bank depends on a third-party developer/security professional who builds your web application/carries out VAPT for your web application, the knowledge of the technology will help you to carry out a better interaction with your outsourced resources.

## Fee Details

### Domestic Participants from

- ★ RRBs & Coop Banks : Rs. 23,010/- (Rs. 19,500/- + 18% GST)
- ★ All other Banks & FIs: Rs. 30,090/- (Rs. 25,500/- + 18% GST)

### Foreign Participants from

- ★ SAARC Countries : US\$ 708/- (US\$ 600/- + 18% GST)
- ★ Other Countries : US\$ 1062/- (US\$ 900/- + 18% GST)

The fees for our programmes can be remitted through NEFT and the bank account details for fee payment available at: <http://bit.ly/PAYFEES>.

## Nominations

Nominations should be sent to us latest by **April 08, 2019** by email to [program@idrbt.ac.in](mailto:program@idrbt.ac.in)

While nominating, please provide the details of the participants (Name, Designation, Bank, Mobile No / Phone No., email address) along with the nominating authority details (Name, Designation, Bank, Mobile No / Phone No., email address, Fees billing address, GST No. of the bank).
