## Website Security

June 10 - 12, 2018

Coordinator: **Dr. Rajarshi Pal**, Assistant Professor, IDRBT

e-mail: [rajarshipal@idrbt.ac.in](mailto:rajarshipal@idrbt.ac.in)

### Introduction

Banks have increasingly become targets of cyber attacks as the criminals eye for financial gains. The attackers target banks infrastructure and more specifically the website, which is facing the customers. Hence, over the years websites have become an easy target for the cyber criminals. There are a series of common vulnerabilities for websites like injection attacks, XSS, CSRF as listed in OWASP top vulnerabilities. Level of sophistication of the attacks has also increased. DDoS is also envisaged as an emerging threat for banks. Recent cases also refer to how ransomwares are distributed through banks' websites. Hence, securing the website is always a major concern for the banks.

### Objective

The objective of this programme is to enlighten the participants with the knowledge of website security. In turn, it will help banks to strengthen the security of their websites. The three-day programme aims to cover several aspects of website security. It will also help the participants in conducting periodic VAPT for their banks' websites.

### Contents

The program tends to cover the following topics:

- \* Securing Website through HTTPS
- \* Defence Against OWASP Top Vulnerabilities
- \* Website Analytics
- \* VAPT
- \* Mobile Application Security

### Who Can Participate?

Staff from IT department and/or CISO office of banks can attend the programme.

### End Use

The programme will strengthen the participants in website security. They will be able to deploy appropriate technologies and strategies to counter threats against websites.

### Faculty

Faculty of IDRBT, Guest Speakers from the Industry & Practitioners.
