SEPTEMBER 04 – 06, 2019

IT Project Management

September 04 - 06, 2019

Coordinator: **Dr. Abhishek Kumar Thakur**, Assistant Professor, IDRBT

e-mail: abhishekt@idrbt.ac.in

Introduction

In today's every aspect of banking is enabled by IT platforms. As the technology is evolving at break-neck speed, there is a rising demand for managers to work faster, smarter, and leaner - often with reduced staff and/or through outsourced service providers. Project management can make or break the project and the teams involved in the execution. The experts all over the world have noted that project management expertise holds the key to greater innovation, improved business performance, and consistent achievement of success across industry, government and community.

This program will equip managers in banks with the latest international practices in project management, so they can effectively face the challenges posed by their dynamic environment with relative ease.

Objective

To provide a solid foundation in project management principles and practice to bankers and IT professionals who are involved in managing IT projects.

Contents

This program will provide a quick overview to various aspects of software engineering and will delve deeper in aspects of project management such as stakeholder management strategy, scope definition, developing schedules, cost estimation, how to manage human resources effectively, responsibility assignment matrix, MIS and communication matrix, project risk management, procurement/outsourcing management, and so forth. The program will not only improve the value we are generating for our organizations, but also improve the value of our lives as we can deliver more output with less effort in shorter times. Special emphasis will be given on management challenges on account of IT projects utilizing software-as-a-service, cloud based deployments and project management for mobile applications.

Who Can Participate?

Executives and officers involved in Managing IT Projects in banks and financial institutions, including vendor management for ongoing support.

End Use

Participants will have a better understanding of the terminology, processes and methodologies used in Project Management. They will be able to manage their internal projects and outsourced partners more efficiently, improve the experience of all their stakeholders, and enjoy greater job satisfaction.

Faculty

Faculty of IDRBT, Guest Speakers from the Industry & Practitioners.
