e-Programme on

DISTRIBUTED LEDGER TECHNOLOGY AND BANKING APPLICATIONS

February 07 – 10, 2022

Introduction

It is widely accepted that Blockchain technology has great potential to cause major disruptions to the way businesses operate. There has been a lot of effort in building varieties of Blockchain platforms with distinct characteristics that leverage this potential in a variety of ways, and a lot of use-cases experimented with. Despite all these efforts in the past 5 years, there is very little in production. This makes it clear that use-cases need to be chosen with great care, and Blockchain platform that is best suited for the use-case to derive maximum business benefit. This program aims to clearly bring out an approach for getting the best business benefit out of Blockchain technology.

Objective

To provide sound understanding of the concepts of Blockchain technology and their use-cases in the BFSI sector. Also, to provide insights into what makes a good use-case for Blockchain technology.

Contents

- Concepts and components of Blockchain technology
- Blockchain platforms and their characteristics
- Survey of Blockchain use-cases in BFSI, and experiences
- Choosing a good use-case for Blockchain, and choosing the right platform for the use-case

Mode of Teaching

Online teaching plus learning inputs through reading material, videos, webinars, assignments, quizzes, online interactions and clarifications. Each e-Programme will have four live webinars and course material will be made available in advance for study.

Who Can Participate?

Officers in innovation team, or any function where the objective is to design new products or improve existing products leveraging the distributed ledger technologies such as Blockchain.

End Use:

Participants will have a better understanding of all aspects of Blockchain technology from basic concepts to platforms to potential use-cases, benefits, and precautions needed. This will help them to choose use-cases for making the best use of Blockchain technology.
