## INTRODUCTION TO AUTHENTICATION TECHNIQUES

March 08 – 11, 2022

---

### Introduction

The retail customers of banks have benefited the most by the use of technology based systems: Core Banking, delivery channels such as Automated Teller Machines, Internet Banking and Mobile Banking, to name a few. Hence, the most important requirement now is the need for identifying the customer who would no longer be visiting the branch premises, but would be accessing services of the bank through the new delivery channels. Authentication plays a vital role especially in the cases where the customer is not present in front of the banker or its authorized representative. Banks can authenticate users through multiple ways. These range from the simple systems such as a combination of the username and password to complex systems such as biometric and/or one time usage based variable tokens.

### Objective

To explore various authentication methods for different delivery channels and challenges in implementing the methods.

### Contents

- Biometrics
- Biometric Standards
- Multifactor Authentication
- PKI, etc.

### Mode of Teaching

Online teaching plus learning inputs through reading material, videos, webinars, assignments, quizzes, online interactions and clarifications. Each e-Programme will have four live webinars and course material will be made available in advance for study.

### Who Can Participate?

Officials from Banking, Financial and Insurance can participate in the programme.

### End Use:

Participants will have a better understanding of various authentication technologies.
