PROACTIVE CYBER DEFENCE STRATEGIES

May 17 – 20, 2022

Introduction

The cyberattacks or incidents are increasing exponentially in number as well as in strength, variety and impact. Due to that, the organizations' reputation and business continuity are at stake. Earlier, due to several reasons (such as overconfidence in their cyber resilience, ill-advised, unawareness etc.), many organizations followed reactive defence strategy and ignored the long-term losses and recovery process from cyber-attacks.

For instance, in reactive defence strategy, while dealing with the NotPetya malware, all the hazardous applications identified as the source of the outbreak will be isolated. Short-term stop-gap solutions could be installing/reconfigure the firewall, DLP solutions, anti-malware applications. Therefore, the reactive approach is heavily attack-dependent, thus failed to provide a reliable solution.

It is high time to move the needle on proactive cyber defence from the reactive strategy. In proactive cyber defence, an organization needs to see from where threats are coming, how they can move within the network, how much it can exploit the systems, where the vulnerabilities are present in the defences. Find and mitigate/close those before the attackers can take any advantage.

Objective

The objective of this e-Programme is to enlighten the participant regarding proactive cyber defence strategy, its benefits over-reactive strategy, different proactive cyber defence exercises such as vulnerability assessment, breach & attack simulation (BAS), penetration testing, red team vs. blue team, cyber drill and cybersecurity exercise. It will help the banks to strengthen their cyber defence provisions.

Contents

- Cyber Exercise
- VA vs. PT vs. BAS
- Cyber drill, Red Team vs. Blue Team exercise, Bug bounty
- Tools and resources for cyber defense, Honeypot
- Case study

Mode of Teaching

Online teaching plus learning inputs through reading material, videos, webinars, assignments, quizzes, online interactions and clarifications. Each e-Programme will have four live webinars and course material will be made available in advance for study.

Who Can Participate?

Bank officials working in IT Department, cyber Security Operations Centre, Network operations Centre and related activities.

End Use:

This e-Programme will help the participant strengthen their knowledge and awareness of cyber security and help the banks improve their cyber defence provisions.

Programme Coordinator:

Dr. Dipanjan Roy, Assistant Professor, IDRBT; e-mail: droy@idrbt.ac.in
